PROFESSIONAL EXPERIENCE

- Motivated and self-driven Junior Penetration Tester with a solid foundation in web application security, complemented by an expanding knowledge in networking and cybersecurity fundamentals. Currently deepening my expertise through networking and security certifications, aiming to grow into a Junior Network Security Administrator role. I seek to contribute to a security-focused team that values innovation, continuous growth, and real-world problem solving

technical skills

- Tools: Burp Suite, Nmap, Metasploit, Wireshark, Nikto, SQLmap, JohnTheRipper, custom-built tools – Languages & Scripting: Python, Bash – Systems: Linux (Kali, Parrot), Windows – Web Security: OWASP Top 10, XSS, SQLi, IDOR, CSRF, SSRF – Other: Git, GitHub, Bash Scripting

PROJECTS & PRACTICAL EXPERIENCE

- Conducted successful bug bounty submissions for platforms including Microsoft and Pinterest – Built custom tools to automate vulnerability detection and reconnaissance – Completed over +200 hands-on labs on TryHackMe covering penetration testing, red teaming, and advanced exploitation – Developed a private toolkit for streamlining web application assessments
